

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

## London & Capital Global Emerging Markets Equity Fund (the “Fund”) Class X GBP Income Shares (ISIN: IE00BFSRZ792)

The Fund is a sub-fund of GemCap Investment Funds (Ireland) plc (the “Company”) Gemini Capital Management (Ireland) Limited, an authorised UCITS management company, act as manager to the Company

## Objectives and Investment Policy

The investment objective is to seek to provide growth through investments in a full range of global emerging market equities (meaning shares in companies). An emerging market is a nation with social or business activity in the process of rapid growth and industrialisation.

Investments will be made in either listed emerging market companies or listed companies in developed markets which get a lot of their revenue from emerging markets. The majority of the Fund’s portfolio is invested in stocks whose companies have exposure to emerging markets. The Fund follows a long-term strategy and holds a diversified number of securities.

The Fund is may not invest more than 10 per cent of its net asset value in other investment funds.

The Fund will generally invest on the basis of its view that the value of a security will grow but may also take positions in specialist financial techniques (known as derivatives) in order that the Fund may, for risk management purposes, gain should the value of certain securities drop. The Fund may invest in derivatives to manage risk in the Fund and protect the Fund’s value in the event that the value of its investments fall and/or manage the Fund more efficiently. The use of derivatives will involve leverage.

The Company may at its discretion declare dividends (i.e. income arising from your Shares will be paid out, subject to Directors approval). Dividends may be declared out of the capital of the Fund in order to preserve cash flow to Shareholders. In any such case, there is a greater risk that capital may be eroded and distribution will be achieved in a manner that foregoes the potential for future capital growth of your investment. This cycle may continue until all capital is depleted. Distributions out of capital may have different tax consequences to distributions of income and the Directors recommend that you seek your own tax advice in this regard.

You may redeem your Shares on demand on any business day that is a United Kingdom and Ireland banking day.

## Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard risk/reward category scale.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean investment is “risk free”.

This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is categorised as a 6 because it is invested in emerging market equities.

The indicator above does not take account of the following risks of investing in the Fund:

**Emerging Markets Risk:** The securities markets in Emerging Markets countries can be smaller, less liquid and often more volatile than securities markets in developed countries and may be subject to additional risks including political, economic, legal, currency, inflation and taxation risks.

**Sub-Custodial Risk:** The assets of funds traded in Emerging Markets may require the custodian to entrust safekeeping to sub-custodians which may not provide the same degree of investor protection.

**Liquidity Risk:** Lower liquidity means there may be insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

**Taxation Risk:** The laws and practices of certain Emerging countries may not be as well established as those of developed countries and the Company could become subject to taxation laws applied retrospectively

**Credit Risk:** Refers to the likelihood of the Fund losing money if an issuer is unable to meet its financial obligations.

**Counterparty Risk:** The Fund may invest in derivative contracts and may find itself exposed to risk arising from the solvency of its counterparties.

**Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the assets they are based on. The use of derivatives may result in the Fund being leveraged whereby the exposure of the Fund as a result of all positions held by it may exceed its net asset value and may result in gains or losses that are greater than the original amount invested.

A more detailed description of the risk factors applicable to the Fund is set out in the “Risk Warnings” section in the Fund’s prospectus and supplement.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges deducted before or after you invest

Entry charge: 5.00% This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.  
Exit charge: 2.00%

### Charges taken from the fund over a year

Ongoing charges: 1.09%

### Charges taken from the Fund under certain specific conditions:

Performance Fee: None

The entry and exit charges shown are maximum figures. In some cases you might pay less.

The on-going charges are based on the 12 months ending 30 June 2017 but may vary from year to year. It excludes portfolio transaction costs, except in the case of an entry/exit

charge paid by another collective investment undertaking.

More information on charges can be found in the prospectus under the section entitled "Fees and Expenses".

## Past Performance

Performance data shall be used to provide a useful indication of past performance to investors.

Past performance is not a guide to future performance. The past performance shown in the chart opposite takes into account all charges.

The Fund was authorised by the Central Bank of Ireland on 29 November 2013.

Past performance has been calculated in the base currency of the Fund which is US Dollars.
