

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

AHFM Defined Returns Fund (the "Fund") Class B Accumulation shares in Euro (Hedged) (ISIN: IE00BG0TNY30)

The Fund is a sub-fund of GemCap Investment Funds (Ireland) plc (the "Company")
Gemini Capital Management (Ireland) Limited, an authorised UCITS management company, act as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate growth in the value of its shares over the medium to long term.

The Fund is suitable for investors who are looking for a high probability of capital growth over the medium to long term, but who are able to withstand medium to higher risks, due to the market sensitivity and potentially volatile nature of the underlying investments.

The Fund aims to meet its objectives via exposure to a diversified portfolio of defined return investments linked to global equity indices. It will invest primarily in a mixture of Transferable Securities (corporate bonds and government bonds rated at least A- by Standard and Poors at outset), Financial Derivative Instruments (FDIs) exposed to global equity indices and cash to gain this exposure. The Fund sells puts, triggered only at their maturity (typically 6 years)

At outset, a defined return investment will only be eligible for inclusion if it provides for a long-term positive return in anything but the bleakest of market conditions. However, investors should be aware that capital is at risk and in the event of very poor equity market performance over a sustained period it is possible that the Fund could generate negative returns. The use of FDIs means that the Fund will employ leverage.

The Fund may take a long exposure, meaning that it will invest directly, or take investment exposure via FDIs, in a security or securities (i.e. equities)

with a view that their value will rise.

The Fund may also take a short exposure for hedging purposes, via FDIs, thus benefitting the fund from a fall in value in a security or securities. Any short exposure within the fund may be up to 100% of the Net Asset value. However, it is intended that the Fund will be managed to operate in normal market conditions within a range of 100% long exposure and 0% short exposure.

This share class will incorporate a FX hedging mechanism which aims to mitigate most of any FX risk between the base currency of the Fund (GBP) and this share class (Euro). Whilst the hedging mechanism should mitigate most of this risk some residual risk is likely to remain which may effect the performance of this share class either positively or negatively.

You may buy or sell shares on any day on which banks in Ireland and the United Kingdom are open for normal business.

Due to the potentially complicated nature of how the investment manager implements the Investment Strategy of the Fund, the Fund's Target Market, as defined within the MiFID 2 product governance guidelines, does not include Execution Only Retail investors. Therefore the Fund should not be purchased by retail investors without them first seeking Professional Investment Advice.

Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard risk/reward category scale.

This indicator is based on value at risk calculations and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may change over time.

The lowest category does not mean investment is "risk free".

This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund's risk category shown is not guaranteed and may change in the future for various reasons including but not limited to general market developments and changes such as geo-political factors.

The Fund is rated five due the nature of its investments and takes into account the following potential risks:

Equity Market Risk: The defined return investments within the Fund, whether via FDIs or Transferable Securities, are all dependent on global equity index performance. In the event of sustained, poor equity market performance the value of the Fund could fall and not recover.

Issuer/Credit Risk: The Fund invests in government and corporate bonds. All bonds will be rated at least A- by Standard and Poors at outset. If any of the bonds the Fund owns suffer credit events the performance of the Fund could be adversely affected.

Liquidity Risk: In certain market conditions some assets in the Fund may become less liquid than at other times so selling at their true value and in a timely manner could become more difficult.

Legal and Regulatory Risk: Future legal or regulatory change could have a significant effect on the Fund.

Other Risks: Other risks the Fund is exposed to include but are not limited to are possible changes in interest rates, changing expectations of future market volatility, changing expectations of equity market correlation and changing dividend expectations. For a more detailed explanation of the risks, please refer to the "Risk Warnings" section of the prospectus.
