This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

London & Capital Global Growth Fixed Income Fund (the “Fund”) Class I GBP Income Shares (ISIN: IE00BDV09P76)

The Fund is a sub-fund of GemCap Investment Funds (Ireland) plc (the “Company”) Gemini Capital Management (Ireland) Limited, an authorised UCITS management company, act as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to seek to grow its value by investing in global fixed income securities, government bonds and corporate bonds. The Fund will seek to outperform US 1 month LIBOR (meaning the average rate at which London banks lend United States Dollars to each other at a given time) plus 3%.

The global fixed income securities, (which are securities that provide the Fund with a predictable income return, together with changes in its capital value) that the Fund will invest in will be listed on one of more of the exchanges set out in Appendix A to the Company’s prospectus.

The Fund may invest in fixed income securities which provide a greater return but which are relatively more risky in terms the issuer’s ability to repay the Fund.

The weighted average credit quality (meaning the credit rating of all of its investments when taken together) of the Fund may be below investment grade (i.e. at or below S&P rating BB+ or equivalent). The Fund will also seek to maintain a relatively medium to high level of volatility (meaning that it will seek to invest in securities which historically tend to move in a medium to high fashion in terms of their value) in its portfolio.

The Fund may also invest in fixed income securities which are issued by countries which are less developed in terms of their financial markets (known as emerging markets).

The Fund may adopt specialist financial techniques (using instruments known as derivatives) to manage risk in the Fund and protect the Fund’s value should the managers deem that the capital value of its investments may fall, or to manage the Fund more efficiently. The use of derivatives will involve leverage.

The Company may at its discretion declare dividends (meaning that any income arising from your Shares will be paid out, subject to Directors’ approval). Dividends may be declared out of the capital of the Fund in order to preserve cash flow to Shareholders. In any such case, there is a greater risk that capital may be eroded and distribution will be achieved in a manner that foregoes the potential for future capital growth of your investment. This cycle may continue until all capital is depleted. Distributions out of capital may have different tax consequences to distributions of income and the Directors recommend that you seek your own tax advice in this regard.

You may redeem your Shares on demand on any business day on which banks are normally open for business in the United Kingdom and Ireland.

Risk and Reward Profile
