

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

AHFM Total Return Fund (the "Fund") Class A GBP Accumulation (ISIN: IE00BDZQTC81)

The Fund is a sub-fund of GemCap Investment Funds (Ireland) plc (the "Company")
Gemini Capital Management (Ireland) Limited, an authorised UCITS management company, act as manager to the Company

Objectives and Investment Policy

The investment objective of the Fund is to generate positive returns in most market conditions over any given three-year period. There is, however, no guarantee that the Fund will achieve its investment objective.

In order to seek to achieve its investment objective, the Fund will invest in a portfolio of equity securities, such as common stock and preferred stock, which will be listed or traded on Recognised Exchanges and may be contained in an eligible financial index. It will also invest in fixed income securities, such as G20 government bonds and investment grade corporate bonds, convertible securities, such as preference shares and convertible bonds. Convertible securities may embed financial derivative instruments ("FDI") and/or leverage.

Investments may also take the form of

- cash and money market instruments such as deposits/certificates of deposit, money market funds, treasury bills, commercial paper;
- regulated collective investment schemes, including exchange-traded funds ("ETFs") which may include any of the Asset Classes as underlying assets. No investment will be made in another Fund of the Company; and
- financial derivative instruments ("FDI") (as detailed further below).

While the Fund is not subject to any industry sector, market capitalisation or geographical constraints on target investments, it may invest in sectors such as financials, technology and healthcare. In addition, the Fund may invest up to 50% of its Net Asset Value in emerging markets, although under normal market conditions it is intended that investment in emerging markets will not exceed 20% of the Fund's Net Asset Value.

The target exposures are that:

- the exposure of the Fund to collective investment schemes (including ETFs) may be between 0% and 10% of the Net Asset Value of the Fund; and
- the exposure of the Fund to cash and money market instruments may be between 0% and 30% of the Net Asset Value of the Fund.

The Fund may, however, have an exposure outside of the above targets at times (for example due to market conditions or market movements).

For any Asset Class which does not have a target exposure listed above, the Fund may be invested up to 100% of its Net Asset Value.

The Fund may utilise the FDI for investment, hedging or efficient portfolio management purposes subject to the limits and conditions imposed by the Central Bank, as set out in section 6 (Efficient Portfolio Management) of the Prospectus. The FDI used may be exchange-traded or over-the-counter ("OTC"), and deliverable or non-deliverable, provided that the Fund may only utilise FDI which are provided for in the Fund's risk management policy once cleared by the Central Bank. The underlying to the FDI will comprise assets consistent with the investment policy of the Fund.

You can buy and sell your shares in the Fund on every business day on which commercial banks in Ireland and the United Kingdom are open for normal banking business.

Risk and Reward Profile

The indicator above illustrates the position of this Fund on a standard risk/reward category scale.

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund.

The risk and reward category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean investment is "risk free".

This indicator is not a measure of the risk that you may lose the amount you have invested.

The Fund is in category 3 because of the exposure to individual equities and the volatility of individual equities.

The indicator above does not take account of the following risks of investing in the Fund:

General Investment Risk: the securities in which the Fund invests are subject to normal market fluctuations and may fall as well as rise in value.

Derivative Risk: The use of derivatives may result in greater returns but may entail greater risk for your investment. Derivatives can also reduce gains you may otherwise have made and may result in greater fluctuations of the net asset value of the Fund.

Credit and Counterparty Risk: There is a risk that the issuer of debt securities or a counterparty to a derivatives contract may not be able to meet interest, principal or settlement payments or otherwise honour their obligations.

Market Risk: The fund may invest in securities and markets which experience specific risks due to increased volatility, liquidity, political and economic stability.

Custodial Risk: There may be a risk of a loss where the assets of the fund are held in custody that could result from insolvency, negligence or fraudulent action of the custodian or sub custodian.

For a more detailed explanation of risks, please refer to the "Risk Warnings" section of the prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry charge: 0.00% This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
Exit charge: 0.00%
